INDEPENDENT AUDITOR'S REPORT

To the Mayor and City Council City of Poth, Texas

We have audited the accompanying financial statements of the governmental activities, the business-type activities, each major fund, and the aggregate remaining fund information of the City of Poth, Texas, as of and for the year ended September 30, 2019, and the related notes to the financial statements, which collectively comprise the City's basic financial statements as listed in the table of contents.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express opinions on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Basis for Qualified Opinion

We were unable to determine the correctness of both utility receivables and their aging at September 30, 2019. Accounting standards and accounting principles generally accepted in the United States of America require that the financial position and the results of operations be presented fairly in accordance with accounting principles generally accepted in the United States of America.

The amount by which this departure would affect the assets, net position, results of operations, and cash flows have not been determined.

Qualified Opinion

In our opinion, except for the effects of the matter described in the "Basis for Qualified Opinion" paragraph, the financial statements referred to above present fairly, in all material respects, the financial position of the City of Poth, Texas, as of September 30, 2019, the changes in financial position, and cash flows, thereof, for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Other Matters

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis, Employee Retirement System Information, and the OPEB system information on pages 3–13, 72-73, and 74 be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Other Information

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the City of Poth, Texas' basic financial statements. The combining and individual nonmajor fund financial statements are presented for purposes of additional analysis and are not a required part of the basic financial statements.

The combining and individual nonmajor fund financial statements are the responsibility of management and were derived from and relate directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the combining and individual nonmajor fund financial statements are fairly stated, in all material respects, in relation to the basic financial statements as a whole.

Management's Discussion and Analysis

As management of the City of Poth, Texas, we offer readers of the City of Poth, Texas' financial statements this narrative overview and analysis of the financial activities of the City of Poth, Texas for the fiscal year ended September 30, 2019.

Financial Highlights:

- The assets of the City of Poth, Texas, exceeded its liabilities at the close of the most recent fiscal year by \$6,337,536 (net position). Of this amount, \$870,935 or 14% is unrestricted net position that may be used to meet the government's ongoing obligations to citizens and creditors.
- The government's total net position increased by \$412,234. The reason for the increase was careful budget management.

As of the close of the current fiscal year, the City of Poth, Texas' governmental funds reported combined ending fund balances of \$907,416. Approximately 34% of this total amount, \$306,222, is available for spending at the government's discretion (unassigned fund balance).

- . At the end of the current fiscal year, unassigned fund balance for the general fund was \$306,222, or 67 percent of total general fund expenditures.
- The City of Poth, Texas' total restricted net position at September 30, 2019 is \$1,055,169 at September 30, 2019 or 17%. The increase for the year was \$230,115. The reason for the increase was sales taxes exceeding economic development expenditures.
- The City of Poth, Texas' total debt decreased by \$90,736 (8 percent) during the current fiscal year. The key factor is the payment of bonded debt of \$129,000.

Overview of the Financial Statements

This discussion and analysis are intended to serve as an introduction to the City of Poth, Texas' basic financial statements. The City of Poth, Texas' basic financial statements comprise three components: 1) government-wide financial statements, 2) fund financial statements, and 3) notes to the financial statements. This report also contains other supplementary information in addition to the basic financial statements themselves.

Government-wide financial statements: The government-wide financial statements are designed to provide readers with a broad overview of the City of Poth, Texas' finances, in a manner like a private-sector business.

The statement of net position presents information on all the City of Poth, Texas' assets, and liabilities, with the difference between the two reported as net position. Over time, increases or decreases in net position may serve as a useful indicator of whether the financial position of the City of Poth, Texas is improving or deteriorating.

The statement of activities presents information showing how the government's net position changed during the most recent fiscal year. All changes in net position are reported as soon as the underlying event giving rise to the change occurs, regardless of the timing of related cash flows. Thus, revenues and expenses are reported in this statement for some items that will only result in cash flows in future fiscal periods (e.g., uncollected taxes and earned but unused vacation leave).

Both of the government-wide financial statements distinguish functions of the City of Poth, Texas that are principally supported by taxes and intergovernmental revenues (governmental activities) from other functions that are intended to recover all or a significant portion of their costs through user fees and charges (business-type activities). The governmental activities of the City of Poth, Texas include general administration, public safety, public transportation, and culture and recreation. The business-type activities of the City of Poth, Texas include the Utility fund.

The government-wide financial statements include only the City of Poth, Texas itself (known as the primary government).

The government-wide financial statements can be found on pages 14-15 of this report.

Fund financial statements: A fund is a grouping of related accounts that is used to maintain control over resources that have been segregated for specific activities or objectives. The City of Poth, Texas, like other state and local governments, uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements. All the funds of the City of Poth, Texas can be divided into two categories: governmental funds and proprietary funds.

Governmental funds: Governmental funds are used to account for essentially the same functions reported as governmental activities in the government-wide financial statements. However, unlike the government-wide financial statements, governmental fund financial statements focus on near-term inflows and outflows of spendable resources, as well as on balances of spendable resources available at the end of the fiscal year. Such information may be useful in evaluating a government's near-term financing requirements.

Because the focus of governmental funds is narrower than that of the government-wide financial statements, it is useful to compare the information presented for governmental funds with similar information presented for governmental activities in the government-wide financial statements. By doing so, readers may better understand the long-term impact of the government's near-term financing decisions. Both the governmental fund balance sheet and the governmental fund statement of revenues, expenditures, and changes in fund balances provide a reconciliation to facilitate this comparison between governmental funds and governmental activities.

The City of Poth, Texas maintains eleven individual governmental funds. Information is presented separately in the governmental fund balance sheet and in the governmental fund statement of revenues, expenditures, and changes in fund balances for the general fund and the economic development MMF which are major funds. Individual fund data for each of the non-major governmental funds is provided in the form of *combining statements* elsewhere in this report.

The City of Poth, Texas adopts an annual appropriated budget for its general fund. A budgetary comparison statement has been provided for the general fund to demonstrate compliance with this budget.

The basic governmental fund financial statements can be found on pages 16-20 of this report.

Proprietary funds: The City of Poth, Texas maintains one type of proprietary fund. Enterprise funds are used to report the same functions presented as business-type activities in the government-wide financial statements. The City of Poth, Texas uses enterprise funds to account for its Utility activities.

Proprietary funds provide the same type of information as the government-wide financial statements, only in more detail. The proprietary fund financial statements provide separate information for the Utility fund which is a major fund of the City of Poth, Texas.

The basic proprietary fund financial statements can be found on pages 21-25 of this report.

Notes to the financial statements: The notes provide additional information that is essential to a full understanding of the data provided in the government-wide and fund financial statements. The notes to the financial statements can be found on pages 26-71 of this report.

Other information: In addition to the basic financial statements and accompanying notes, this report also presents certain required supplementary information concerning the City of Poth, Texas' progress in funding its obligation to provide pension benefits to its employees. Required supplementary information can be found on page 72-74 of this report.

The combining statements referred to earlier in connection with non-major governmental funds are presented immediately following the required supplementary information on pensions. Combining and individual fund statements and schedules can be found on pages 75-76 of this report.

Government-Wide Financial Analysis

As noted earlier, net position may serve over time as a useful indicator of a government's financial position. In the case of the City of Poth, Texas, assets exceeded liabilities by \$6,337,536 at the close of the most recent fiscal year.

By far the largest portion of the City of Poth, Texas' net position (70 percent) reflects its investment in capital assets (e.g., land, buildings, machinery, and equipment) less any related debt used to acquire those assets that is still outstanding. The City of Poth, Texas uses these capital assets to provide services to citizens; consequently, these assets are not available for future spending. Although the City of Poth, Texas' investment in its capital assets is reported net of related debt, it should be noted that the resources needed to repay this debt must be provided from other sources, since the capital assets themselves cannot be used to liquidate these liabilities.

CITY OF POTH, TEXAS NET POSITION

	Governmental Activities		Business-Type Activities		Total	
	2019	2018	2019	2018	2019	2018

Total Deferred Outflows of Resources	4,603	8,923	6,785	21,122	11,388	30,045
Invested in Capital Assets,						
Net of Related Debt	2,183,805	2,193,617	2,227,627	2,222,854	4,411,432	4,416,471
Restricted	403,218	289,808	651,951	535,246	1,055,169	825,054
Unrestricted	512,900	378,364	358,035	305,413	870,935	683,777
Total Net Position	\$3,099,923	\$2,861,789	\$3,237,613	\$3,063,513	\$6,337,536	\$5,925,302

An additional portion of the City of Poth, Texas' net position (17 percent) represents resources that are subject to external restrictions on how they may be used. The remaining balance of unrestricted net position \$870,935 may be used to meet the governments on going obligations to citizens and creditors. At the end of the current fiscal year, the City of Poth, Texas reported positive balances in all three categories of net position, both for the government, as well as for its separate governmental and business-type activities. For the prior fiscal year, the City of Poth, Texas reported positive balances in all three categories of net position, both for the government, as well as for its separate governmental and business-type activities.

The government's total net position increased by \$412,234. The reason for the increase was careful budget management.

Governmental Activities:

Governmental activities increased the City of Poth, Texas' net position by \$238,134, thereby accounting for 58 percent of the total growth in the net position of the City of Poth, Texas. The reason for this increase is careful budget management.

Financial Analysis of the Government's Funds

As noted earlier, the City of Poth, Texas uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements.

Governmental funds:

The focus of the City of Poth, Texas' governmental funds is to provide information on near-term inflows, outflows, and balances of spendable resources. Such information is useful in assessing the City of Poth, Texas' financing requirements. Unassigned fund balance may serve as a useful measure of a government's net resources available for spending at the end of the fiscal year.

As of the end of the current fiscal year, the City of Poth, Texas' governmental funds reported combined ending fund balances of \$907,416, an increase of \$214,676 in comparison with the prior year. Approximately 34 percent of this total amount \$306,222 constitutes unassigned fund balance, which is available for spending at the government's discretion. The remainder of fund balance is reserved to indicate that it is not available for new spending because it has already been committed and restricted.

The general fund is the chief operating fund of the City of Poth, Texas. At the end of the current fiscal year, unassigned fund balance of the general fund was \$306,222, while total fund balance reached \$468,467. As a measure of the general fund's liquidity, it may be useful to compare both unassigned fund balance and total fund balance to total fund expenditures. Unassigned fund balance represents 67 percent of total general fund expenditures, while total fund balance represents 102 percent of that same amount.

The fund balance of the City of Poth, Texas' general fund increased by \$101,323 during the current fiscal year. This increase is primarily a result of a reduction of street expenditures of \$43,750 and good budget management.

At the end of the current fiscal year, unassigned fund balance of the economic development MMF fund was \$00, while total fund balance reached \$82,034. As a measure of the economic development MMF fund's liquidity, it may be useful to compare both unassigned fund balance and total fund balance to total fund expenditures. Unassigned fund balance represents 00 percent of total economic development MMF fund expenditures, while total fund balance represents 58 percent of that same amount.

The fund balance of the City of Poth, Texas' economic development MMF fund increased by \$16,260 during the current fiscal year. This increase is primarily a result of transfers in of \$206,250 from the general fund.

Proprietary funds:

The City of Poth, Texas' proprietary funds provide the same type of information found in the government-wide financial statements, but in more detail.

Unrestricted net position of the Utility fund at the end of the year amounted to \$358,035. The increase in net position was \$174,100. Other factors concerning the finances of this fund have already been addressed in the discussion of the City of Poth, Texas' business-type activities.

General Fund Budgetary Highlights

There was an increase of \$55,400 between the original budget and the final amended budget. The major increase was in streets which increased by \$50,745. The major reason for this increase was in seal coating.

Capital Asset and Debt Administration

Capital assets:

The City of Poth, Texas' investment in capital assets for its governmental and business-type activities as of September 30, 2019, amounts to \$5,340,141 (net of accumulated depreciation). This investment in capital assets includes land, buildings and system, improvements, machinery and equipment, park facilities, roads, highways, and bridges. The total decrease in the City of Poth, Texas' investment in capital assets for the current fiscal year was 2 percent (a 2 percent decrease for governmental activities and a 2 percent decrease for business-type activities).

Major capital asset events during the current fiscal year included the following:

Water System improvements.

	646,700		00,004					
Grand Total	\$970,000	\$0	\$129,000	\$0	\$0	\$841,000	\$132,000	\$709,000

The bonded debt of the City of Poth decreased by \$129,000 or (13%). This is a result of the payment of bond principal of \$129,000.

Additional information on the City of Poth, Texas' long - term debt can be found in Note IV F on page 39 of this report.

Economic Factors:

The Eagle Ford Oil and Gas Shale have brought in new businesses which have increased the sales taxes and charges for services.

As a result of the spread of the COVID-19 coronavirus, economic uncertainties have arisen which may negatively affect the financial position, results of operations and cash flows of the City. The duration of these uncertainties and the ultimate financial effects cannot be reasonably estimated at this time.

Requests for Information

This financial report is designed to provide a general overview of the City of Poth, Texas' finances for all those with an interest in the government's finances. Questions concerning any of the information provided in this report or requests for additional financial information should be addressed to the Office of the Finance Department, P.O. Box 579, Poth, Texas 78147.

CITY OF POTH, TEXAS RECONCILIATION OF THE STATEMENT OF REVENUES, EXPENDITURES, AND CHANGES IN FUND BALANCES OF GOVERNMENTAL FUNDS TO THE STATEMENT OF ACTIVITIES SEPTEMBER 30, 2019

Net Changes in Fund Balances - Total Governmental Funds	\$214,676
Amounts reported for governmental activities in the statement of net position ("SNA") are different because:	
Governmental funds report capital outlays as expenditures. However, in the statement of activities the cost of those assets is allocated over their estimated useful lives and reported as depreciation expense. This is the amount by which capital outlays	(52,808)
exceeded depreciation in the current period.  Amortization of Bond Refunding Loss.	(1,969)
GASB 68 Contributions. This is the change in these amounts this year.	4,044
Difference in expected and actual experience. This is the change in these amounts this year.	(4,338)
Difference in projected and actual earnings. This is the change in these amounts this year.	27,987
GASB 75 Difference in assumption changes. This is the change in these amounts this year.	(578)
Difference in assumption changes. This is the change in these amounts this year.  Difference in projected and actual earnings.	(1,551)
Certain property tax revenues are deferred in the funds. This is the change in these amounts this year.	113
Increase in loan principal are receipts in the funds but not revenue in the SOA.	0
(Increase) decrease in accrued interest from beginning of period to end of period.	129
(Increase) decrease in compensated absences from beginning of period to end of period.	5,187
Other long-term assets are not available to pay for current period	25,103
expenditures and, therefore, are deferred in the funds. This is the change in these amounts this year.	(18,426)
(Increase) decrease in Net Pension Liability from beginning of period to end of period.	(2,431)
(Increase) decrease in OPEB Liability from beginning of period to end of period.	42,996
Repayment of loan principal is an expenditure in the funds but not an expense in the SOA.	42,990
Change in Net Position of Governmental Activities - Statement of Activities	\$238,134

#### CITY OF POTH, TEXAS NOTES TO FINANCIAL STATEMENTS SEPTEMBER 30, 2019

#### I. Summary of significant accounting policies

## A. Reporting entity/ Basis of Accounting/Measurement Focus

The City of Poth, Texas, was incorporated by an election. The City operates under a General Law type of government and provides the following services: public safety (fire, ambulance, and law enforcement), public transportation (streets), health, culture, recreation, public facilities, legal, election functions, and general administrative services. The accounting policies of the City of Poth, Texas, (the City) conform to generally accepted accounting principles. The City also applies all relevant Government Accounting Standards Board (GASB) pronouncements. The following is a summary of the more significant policies.

The accounts of the City are organized based on funds, each of which is considered a separate accounting entity. The operations of each fund are accounted for with a separate set of self-balancing accounts that comprise its assets, deferred outflows of resources, liabilities, deferred inflows of resources, fund equity, revenues, and expenditures or expenses, as appropriate. Governmental resources are allocated to and accounted for in individual funds based upon the purposes for which they are to be spent and how spending activities are controlled.

#### B. Government-wide and fund financial statements

The City's Government-Wide Financial Statements include a statement of net position and a statement of activities. These statements present summaries of governmental and business-type activities for the City accompanied by a total column.

These statements are presented on an "economic resources" measurement focus and the accrual basis of accounting. Accordingly, all the City's assets, deferred outflows of resources, liabilities, and deferred inflows of resources, including capital assets and long-term liabilities, are included in the accompanying statement of net position. The statement of activities presents changes in net position. Under the accrual basis of accounting, revenues are recognized in the period in which they are earned while expenses are recognized in the period in which the liability is incurred, regardless of the timing of related cash flows. The types of transactions reported as program revenues for the City are reported in three categories: 1) charges for services, 2) operating grants and contributions, and 3) capital grants and contributions.

Certain eliminations have been made to interfund activities, payables, and receivables. All internal balances in the statement of net position have been eliminated except those representing balances between the governmental activities and the business-type activities, which are presented as internal balances and eliminated in the total primary government column. In the statement of activities, those transactions between governmental and business-type activities have not been eliminated. When both restricted and unrestricted resources are available for use, it is the City's policy to use restricted resources first, then unrestricted resources as they are needed.

#### C. Governmental Fund Financial Statements

Governmental fund financial statements include a balance sheet and a statement of revenues, expenditures, and changes in fund balances for all major governmental funds and non-major funds aggregated. An accompanying schedule is presented to reconcile and explain the differences in fund balances and changes in fund balances as presented in these statements to the net position and changes in net position presented in the government-wide financial statements. The City has presented all major funds that met those qualifications.

All governmental funds are accounted for on a spending or "current financial resources" measurement focus and the modified accrual basis of accounting. Accordingly, only current assets and current liabilities are included on the balance sheets. (The City's deferred outflows of resources and deferred inflows of resources are noncurrent.) The statement of revenues, expenditures, and changes in fund balances present increases (revenues and other financing sources) and decreases (expenditures and other financing uses) in net current assets. Under the modified accrual basis of accounting, revenues are recognized in the accounting period in which they become both measurable and available to finance expenditures of the current period. Accordingly, revenues are recorded when received in cash, except that revenues subject to accrual (generally 60 days after year-end) are recognized when due. The primary revenue sources, which have been treated as susceptible to accrual by the City, are property taxes, sales taxes, and franchise taxes. Expenditures are recorded in the accounting period in which the related fund liability is incurred.

The government reports the following major governmental funds:

The general fund is the government's primary operating fund. It accounts for all financial resources of the general government, except those required to be accounted for in another fund.

The economic development fund MMF used for special projects and for debt service.

# D. Proprietary fund financial statements

Proprietary fund financial statements include a statement of net position, a statement of revenues, expenses and changes in fund net position, and a statement of cash flows for each major proprietary fund and for the non-major funds aggregated.

Proprietary funds are accounted for using the "economic resources" measurement focus and the accrual basis of accounting. Accordingly, all assets, deferred outflows of resources, liabilities (whether current or noncurrent), and deferred inflows of resources are included on the statement of net position. The statement of revenues, expenses, and changes in fund net position present increases (revenues) and decreases (expenses) in total net position. Under the accrual basis of accounting, revenues are recognized in the period in which they are earned while expenses are recognized in the period in which the liability is incurred, regardless of the timing of related cash flows.

Proprietary funds distinguish operating revenues and expenses from nonoperating items. Operating revenues and expenses generally result from providing services and producing and delivering goods in connection with a proprietary fund's principal ongoing operations. The principal operating revenues of the utility fund (water, sewer, and garbage) are charges to customers for sales and services. Operating expenses for enterprise funds include the cost of sales and services, administrative expenses, and depreciation on capital assets. All revenues and expenses not meeting this definition are reported as nonoperating revenues and expenses. When both restricted and unrestricted resources are available for use, it is the City's policy to use restricted resources first, then unrestricted resources as they are needed.

The government reports the following major proprietary funds:

The utility fund accounts for the activities of the government's water, sewer, and garbage operations.

#### E. Blended Component Units

The Poth Economic Development EDC and MMF are governed by boards appointed by the City Council who can impose their will on the Poth Economic Development EDC and MMF. Although they are legally separate from the City, the Poth Economic Development EDC and MMF are reported as if they are a part of the primary government because their primary purpose is to provide services to the citizens of the City. They are reported as a special revenue fund of the City. Separate financial statements are not prepared for the blended component units.

#### F. Assets, liabilities, and Net Position or equity

#### 1. Deposits and investments

The government's cash and cash equivalents are cash on hand, demand deposits, and short-term investments with original maturities of three months or less from the date of acquisition.

State statutes authorize the government and the District to invest in obligations of the U.S. Treasury. Investments for the government are reported at fair value.

For purposes of the statement of cash flows, the City considers all highly liquid investments (including restricted assets) with a maturity when purchased of three months or less and all local government investment pools to be cash equivalents.

#### 2. Receivables and payables

Activity between funds that are representative of lending/borrowing arrangements outstanding at the end of the fiscal year are referred to as either "due to/from other funds" (i.e., the current portion of inter-fund loans) or "advances to/from other funds" (i.e., the non-current portion of interfund loans). All other outstanding balances between funds are reported as "due to/from other funds." Any residual balances outstanding between the governmental activities and business-type activities are reported in the government-wide financial statements as "internal balances."

Advances between funds, as reported in the fund financial statements, are offset by a fund balance reserve account in applicable governmental funds to indicate that they are not available for appropriation and are not expendable available financial resources.

All trade and property tax receivables are shown net of an allowance for uncollectibles. Trade accounts receivable allowance in excess of 30 days is equal to 5 percent of outstanding trade accounts receivable at September 30, 2019, the trade accounts receivable allowance in excess of 60 days is equal to 50 percent of outstanding trade accounts receivable at September 30, 2019, the trade accounts receivable allowance in excess of 90 days is equal to 100 percent of outstanding trade accounts receivable at September 30, 2019. The property tax receivable allowance is equal to 1 percent of current outstanding property taxes at September 30, 2019, and 10 percent of delinquent outstanding property taxes at September 30, 2019.

Property is appraised and a lien on such property becomes enforceable as of January 1, subject to certain procedures for rendition, appraisal, appraisal review and judicial review. Traditionally, property taxes are levied October 1, of the year in which assessed or as soon thereafter as practicable. Taxes are due and payable when levied since that is when the City bills the taxpayers. The City begins to collect the taxes as soon as the taxpayers are billed.

#### 3. Inventories and prepaid items

Inventories are considered immaterial and, therefore, there were no inventory items at September 30, 2019.

There were no prepaid items at September 30, 2019.

#### 4. Restricted assets

Certain proceeds of the enterprise fund revenue bonds, as well as certain resources set aside for their repayment, are classified as restricted assets on the balance sheet because they are maintained in separate bank accounts and their use is limited by applicable bond covenants. Monies are set aside in the general fund for future projects and are maintained in a separate bank account.

The restricted assets at September 30, 2019 were as follows:

Type	Governmental Activities	Business-Type Activities	Total
Administration	\$23,864	\$651,951	\$675,815
Economic Development	360,821	0	360,821
Public Safety	32,925	0	32,925
Street Maintenance	162,245	0	162,245
	\$579,855	\$651,951	\$1,231,806

#### 5. Capital assets

Capital assets, which include property, plant, equipment, and infrastructure assets (e.g. roads, bridges, sidewalks, and similar items), are reported in the applicable governmental or business-type activities columns in the government-wide financial statements. Capital assets are defined by the government as assets with an initial, individual cost of more than \$5,000 (amount not rounded) and an estimated useful life more than two years. Such assets are recorded at historical cost or estimated historical cost if purchased or constructed. Donated capital assets are recorded at estimated fair market value at the date of donation.

The costs of normal maintenance and repairs that do not add to the value of the asset or materially extend assets lives are not capitalized.

Major outlays for capital assets and improvements are capitalized as projects are constructed. Interest incurred during the construction phase of capital assets of business-type activities is included as part of the capitalized value of the assets constructed. The City is performing public improvements for street paving.

Property, plant, and equipment of the primary government are depreciated using the straight-line method over the following estimated useful lives:

Years
50
20
50
30
5
5
5

# 6. Compensated absences

It is the government's policy to permit employees to accumulate earned but unused vacation and sick pay benefits. There is no liability for unpaid accumulated sick leave since the government does not have a policy to pay any amounts when employees separate from service with the government. All vacation pay is accrued when incurred in the government-wide and proprietary fund financial statements. A liability for these amounts is reported in governmental funds.

## 7. Long-term obligations

In the government-wide financial statements and proprietary fund types in the fund financial statements, long-term debt and other long-term obligations are reported as liabilities in the applicable governmental activities, business-type activities, or proprietary fund type statement of net position. Bond premiums and discounts, as well as issuance costs, are deferred and amortized over the life of the bonds using the effective interest method. Bonds payable are reported net of the applicable bond premium or discount. Bond issuance costs are reported as deferred charges and amortized over the term of the related debt.

In the fund financial statements, governmental fund types recognize bond premiums and discounts, as well as bond issuance costs, during the current period. The face amount of debt issued is reported as other financing sources. Premiums received on debt issuances are reported as other financing sources while discounts on debt issuances are reported as other financing uses. Issuance costs, whether withheld from the actual debt proceeds received, are reported as debt service expenditures.

#### 8. Fund Balances – Governmental Funds

As of September 30, 2019, fund balances of the governmental funds are classified as follows:

**Restricted** — amounts that can be spent only for specific purposes because of constitutional provisions or enabling legislation or because of constraints that are externally imposed by creditors, grantors, contributors, or the laws or regulations of other governments.

**Committed** — amounts that can be used only for specific purposes determined by a formal action of City Council. City Council is the highest level of decision-making authority for the City. Commitments may be established, modified, or rescinded only through ordinances or resolutions approved by City Council.

Unassigned — all other spendable amounts.

As of September 30, 2019, fund balances are composed of the following:

#### Fund Balances:

Restricted	
Special Projects	\$12,615
Economic Development	353,313
Public Safety	37,290
Committed	
Administration	35,731
Street Maintenance	162,245
Unassigned	306,222
Total Fund Balance	\$907,416

When an expenditure is incurred for purposes for which both restricted and unrestricted fund balance is available, the City considers restricted funds to have been spent first. When an expenditure is incurred for which committed, assigned, or unassigned fund balances are available, the City considers amounts to have been spent first out of committed funds, then assigned funds, and finally unassigned funds, as needed, unless City Council or the finance committee has provided otherwise in its commitment or assignment actions.

The City Council adopted a minimum fund balance policy for the General Fund. The policy requires the unassigned fund balance at fiscal year end to be at least equal to 25 to 33 percent of the subsequent year's budgeted General Fund expenditures.

#### 9. Comparative data/reclassifications

Comparative total data for the prior year have been presented only for individual enterprise funds in the fund financial statements to provide an understanding of the changes in the financial position and operations of these funds. Also, certain amounts presented in the prior year data have been reclassified to be consistent with the current year's presentation.

#### 10. Deferred outflows/inflows of resources

In addition to assets, the statement of financial position will sometimes report a separate section for deferred outflows of resources. This separate financial statement element, *deferred outflows of resources*, represents a consumption of net position that applies to a future period(s) and so will *not* be recognized as an outflow of resources (expense/ expenditure) until then. The government only has two items that qualify for reporting in this category. They are amounts deferred under GASB 68 and GASB 75.

In addition to liabilities, the statement of financial position will sometimes report a separate section for deferred inflows of resources. This separate financial statement element, *deferred inflows of resources*, represents an acquisition of net position that applies to a future period(s) and so will *not* be recognized as an inflow of resources (revenue) until that time. The government only has two items that qualify for reporting in this category. They are amounts deferred under GASB 68 and GASB 75.

The City reports unearned revenue on its fund financial statements. Unearned revenues arise when potential revenue does not meet both the "measureable" and "available" criteria for recognition in the current period (fund financial statements). Unearned revenues also arise when resources are unearned by the City and received before it has a legal claim to them, as when grant monies are received prior to the incurrence of qualifying expenditures (fund financial statements and government-wide financial statements). In subsequent periods, when both revenue recognition criteria are met, or when the City has a legal claim to the resources, the liability for unearned revenue is removed from the applicable financial statement and revenue is recognized. Pursuant to GASB 65 we have included deferred ad valorem taxes as deferred inflows in the fund financial statements.

#### 11. Net position flow assumption

Sometimes the government will fund outlays for a particular purpose from both restricted (e.g., restricted bond or grant proceeds) and unrestricted resources. In order to calculate the amounts to report as restricted net position and unrestricted - net position in the government-wide and proprietary fund financial statements, a flow assumption must be made about the order in which the resources are considered to be applied. It is the government's policy to consider restricted - net position to have been depleted before unrestricted - net position is applied.

#### 12. Use of Estimates

The financial statements and related disclosures are prepared in conformity with accounting principles generally accepted in the United States. Management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements, and revenue and expenses during the period reported. These estimates include assessing the collectability of accounts receivable, the use and recoverability of inventory, and the useful lives and impairment of tangible and intangible assets, among others. Estimates and assumptions are reviewed periodically, and the effects of revisions are reflected in the financial statements in the period they are determined to be necessary. Actual results could differ from the estimates.

#### 13. New Pronouncements

GASBS No. 84, *Fiduciary Activities*, amends GASBS No. 34, paragraph 12, to replace the phrase "component units that are fiduciary in nature" with the phrase "fiduciary component units." GASBS No. 84 is effective for reporting periods beginning after December 15, 2018, with earlier implementation encouraged.

GASBS No. 87, *Leases*. GASBS No. 87 is effective for reporting periods beginning after December 15, 2019, with earlier implementation encouraged. GASBS No. 87 requires that operating leases, other than short-term, be included into the financial statements.

## II. Reconciliation of government-wide and fund financial statements

A. Explanation of certain differences between the governmental fund balance sheet and the government-wide statement of net position

The governmental fund balance sheet includes a reconciliation between fund balance - total governmental funds and net position - governmental activities as reported in the government-wide statement of net position. One element of that reconciliation explains that "Long-term liabilities, including bonds payable, are not due and payable in the current period and therefore are not reported in the funds." The details of this \$369,667 difference are as follows:

\$280,305
841
70,468
13,827
4,226
\$369,667

The governmental fund statement of revenues, expenditures, and changes in fund balances includes a reconciliation between net changes in fund balances - total governmental funds and changes in net position of governmental activities as reported in the government-wide statement of activities. One element of that reconciliation explains that "Governmental funds report capital outlays as expenditures. However, in the statement of activities the cost of those assets is allocated over their estimated useful lives and reported as depreciation expense." The details of this \$2,464,110 difference are as follows:

Capital Assets Not Being	
Depreciated	\$198,416
Capital Assets Being Depreciated	3,132,614
Accumulated Depreciation	(866,920)

Net Adjustment to Increase Net Changes in Fund Balances - Total Governmental Funds to Arrive at Changes in Net Position of Governmental Activities

\$2,464,110

A. Explanation of certain differences between the governmental fund balance sheet and the government-wide statement of net position (continued)

The governmental fund balance sheet includes reconciliation between fund balance - total governmental funds and net position - governmental activities as reported in the government-wide statement of net position. One element of that reconciliation explains that "Property taxes receivable unavailable to pay for current period expenditures are deferred in the funds (net of allowance for uncollectibles.") The details of this \$29,519 difference are as follows:

Property Taxes Receivable	\$32,208
Allowance for Doubtful Accounts	(2,689)
Net	\$29,519

The governmental fund balance sheet includes reconciliation between fund balance - total governmental funds and net position - governmental activities as reported in the government-wide statement of net position. One element of that reconciliation explains that "Municipal fines and fees receivable unavailable to pay for current period expenditures are deferred in the funds (net of allowance for uncollectibles.") The details of this \$27,219 difference are as follows:

Fines and Fees Receivable	\$107,318
Allowance for Doubtful Accounts	(80,099)
Net	\$27,219

B. Explanation of certain differences between the governmental fund statement of revenues, expenditures, and changes in fund balances and the government-wide statement of activities

The governmental fund statement of revenues, expenditures, and changes in fund balances includes a reconciliation between net changes in fund balances - total governmental funds and changes in net position of governmental activities as reported in the government-wide statement of activities. One element of that reconciliation explains that "Governmental funds report capital outlays as expenditures. However, in the statement of activities the cost of those assets is allocated over their estimated useful lives and reported as depreciation expense." The details of this (\$52,808) difference are as follows:

Capital Outlay - Additions	\$19,022
Capital Outlay - Dispositions - Net	0
Depreciation Expense	(71,830)
Net Adjustment to	
Increase Net Changes	
in Fund Balances - Total	
Governmental Funds to	
Arrive at Changes in	
Net Position of	
Governmental Activities	(\$52,808)

## III. Stewardship, compliance, and accountability

#### A. Budgetary information

The Mayor has been authorized by the council to prepare the budget. She is assisted by the City Secretary. The budget is adopted on budgetary basis in conformity with generally accepted accounting principles. After the budget is prepared, it is reviewed by the City Council. The budget is adjusted by the City Council if desired. Then a final budget is prepared by the Mayor. A public hearing is held on the budget by the City Council. Department heads may appear. Before determining the final budget, the City Council may increase or decrease the amounts requested by the various departments or citizens. Amounts finally budgeted may not exceed the estimate of revenues and available cash. Appropriations lapse at year end.

When the budget is adopted by the City Council, the Mayor is responsible for monitoring the expenditures of the various departments of the City to prevent expenditures from exceeding budgeted appropriations and for keeping the members of the City Council advised of the conditions of the various funds and accounts. The level of control is the fund. Expenditures can exceed appropriations if they do not exceed available revenues and cash balances. The legal level of control (the level on which the City Council must approve over expenditures) is on an object class basis.

The appropriated budget is prepared by fund, function, and department. The government's department heads may make transfers of appropriations within a department. Transfers of appropriations between departments require the approval of the council. The legal level of budgetary control (i.e. the level at which expenditures may not legally exceed appropriations) is the department level.

Encumbrance accounting is employed in governmental funds. Encumbrances (e.g., purchase orders, contracts) outstanding at year end are reported as reservations of fund balances and do not constitute expenditures or liabilities because the commitments will be re-appropriated and honored during the subsequent year. There were no outstanding encumbrances at September 30, 2019.

#### B. Excess of expenditures over appropriations

For the year ended September 30, 2019, excess of expenditures over appropriations did not occur in the general fund. There was no budget adopted for the Economic Development MMF Fund.

#### C. Deficit fund equity

The City had no deficit fund balances as of September 30, 2019.

#### IV. Detailed notes on all funds

## A. DEPOSITS AND INVESTMENTS

Legal and Contractual Provisions Governing Deposits and Investments

The Public Funds Investment Act (Government Code Chapter 2256) contains specific provisions in the areas of investment practices, management reports and establishment of appropriate policies. Among other things, it requires the City to adopt, implement, and publicize an investment policy. That policy must address the following areas: (1) safety of principal and liquidity, (2) portfolio diversification, (3) allowable investments, (4) acceptable risk levels, (5) expected rates of return, (6) maximum allowable stated maturity of portfolio investments, (7) maximum average dollar-weighted maturity allowed based on the stated maturity date for the portfolio, (8) investment staff quality and capabilities, (9) and bid solicitation preferences for certificates of deposit. Statutes authorize the City to invest in (1) obligations of the U.S. Treasury, certain U.S. agencies, and the State of Texas; (2) certificates of deposit, (3) certain municipal securities, (4) money market savings accounts, (5) repurchase agreements, (6) bankers acceptances, (7) Mutual Funds, (8) Investment pools, (9) guaranteed investment contracts, (10) and common trust funds. The Act also requires the City to have independent auditors perform test procedures related to investment practices as provided by the Act. The district is not in substantial compliance with the requirements of the Act and with local policies because, the City has adopted an investment policy but does not have a certified investment officer.

#### Policies Governing Deposits and Investments

a. The City's deposits and certificates of deposit are entirely with the city's one depository bank and are entirely covered by federal depository insurance (FDIC) or by collateral held by the government's agent in the government's name. The FDIC insures the first \$250,000 of checking accounts and \$250,000 of interest-bearing accounts. Deposit balances over the respective \$250,000 are insured by the collateral. As of year end, the carrying amount of the City's total bank balances totaled \$1,913,157 while the value of securities pledged at September 30, 2019 is \$1,996,894. The book amount of cash at September 30, 2019 is \$1,860,855.

The securities are held by the pledging financial institution's trust department.

The City had no investments at September 30, 2019.

#### B. Receivables

Receivables as of year end for the government's individual major funds and non-major funds in the aggregate, including the applicable allowances for uncollectible accounts, are as follows:

	General	Utility	Total
Receivables			
Taxes	\$32,208		\$32,208
Accounts		118,877	118,877
Other			0
Fines	107,318		107,318
Gross Receivables	139,526	118,877	258,403
Less: Allowance for			
Uncollectibles	82,788	21,511	104,299
0.1.00.1.0			
Net Total Receivables	\$56,738	\$97,366	\$154,104

Governmental funds report deferred revenue in connection with receivables for revenues that are not considered to be available to liquidate liabilities of the current period. Governmental funds also defer revenue recognition in connection with resources that have been received, but not yet earned. At the end of the current fiscal year, the various components of deferred revenue and unearned revenue reported in the governmental funds were as follows:

	Unearned <u>Revenue</u>
Delinquent property taxes receivable (General fund)	\$ 29,519
Total deferred/unearned revenue for governmental funds	<u>\$ 29,519</u>

# C. Capital assets

Capital asset activity for the year ended September 30, 2019 was as follows:

Governmental Activities:	Beginning			Ending
Capital assets not being depreciated:	Balances	Increases	Decreases	Balances
Land	\$181,033	\$400	\$0	\$181,433
CIP	\$16,983			\$16,983
Total capital assets not being depreciated:	198,016	400	0	198,416
Capital assets being depreciated:				
Building and Improvements	269,870	8,070	0	277,940

Total capital assets being depreciated:	3,113,992	18,622	0	3,132,614
Less: Accumulated Depreciation for:				
Building and Improvements	143,415	10,518	0	153,933
Machinery, Equipment and Vehicles	216,350	11,033		227,383
Infrastructure	435,325	50,279	0	485,604
Total Accumulated Depreciation	795,090	71,830	0	866,920
Total Capital Assets Depreciated, Net	2,318,902	(53,208)	0	2,265,694
Governmental Activities capital assets, Net	\$2,516,918	(\$52,808)	\$0	\$2.464.110
2.00	Ψ2,310,310	(\$32,000)	Φ0	\$2,464,110
Business-Type Activities:	Beginning			Ending
Capital assets not being depreciated:	Balances	Increases	Decreases	Balances
Land	\$82,134			\$82,134
Construction in Progress	0	29,400	·	29,400
Total capital assets not being depreciated:	82,134	29,400	0	111,534
Capital assets being depreciated:				
Building and Improvements	6,129,770	60,069		6,189,839
Machinery, Equipment and Vehicles	459,185	47,486		506,671
Total capital assets being depreciated:	6,588,955	107,555	0	6,696,510
Less: Accumulated Depreciation for:				
Building and Improvements	3,395,018	161,603		3,556,621
Machinery, Equipment and Vehicles	339,376	36,016		375,392
Total Accumulated Depreciation	3,734,394	197,619	0	3,932,013
Total Capital Assets Depreciated, Net	2,854,561	(90,064)	0	2,764,497
Business-Type Activities Capital Assets, Net	\$2,936,695	(\$60,664)	\$0	\$2,876,031

Depreciation expense was charged to functions/programs of the primary government as follows:

Governmental Activities	
General Administration	\$404
Public Safety	9,182
Public Transportation	50,180
Culture and Recreation	12,064
Total Depreciation Expense - Governmental Activities	\$71,830
•	
Business-Type Activities	
Utility	\$197,619
Total Depreciation Expense - Business-Type Activities	\$197,619
Total Bepreciation Zapenze = -51	

#### Construction commitments:

The City is performing public improvements for street paving.

# D. Inter-fund receivables, payables, and transfers

The City had no due to/from other funds at September 30, 2019.

The intra-fund fund transfers for the year ended September 30, 2019 are non-recurring and are as follows:

<u>TRANSFER</u> FROM	TO	AMOUNT	REASON
UTILITY FUND GENERAL FUND ECONOMID DEVELOPMENT EDC FUND	RIDE TO REMEMBER ECONOMIC DEVELOPMENT MMF FUND CAPITAL PROJECTS EDC FUND	¥,- ·	PROVIDE CAPITAL FUNDS PROVIDE CAPITAL FUNDS PROVIDE CAPITAL FUNDS

#### E. Leases

The City had no Operating Leases.

Rent expenditures were \$0 for the year ended September 30, 2019. Rental income was \$14,540 for the year ended September 30, 2019. Sublease rental income was \$0 for the year ended September 30, 2019.

#### F. Long-term debt

#### Bonds

The Tax and Revenue Refunding Bonds are direct obligations and pledge the full faith and credit of the government and are secured by both the ad valorem taxes and utility revenue sources. The refunding bonds currently outstanding are as follows:

<u>Purpose</u>	Rates	Amount	<u>Collateral</u>
Governmental activities	2.40	\$280,304	Ad Valorem Taxes and Utility Revenues
Business-type activities	2.40	\$560,696	Ad Valorem Taxes and Utility Revenues

Year Ending	Governmenta	l Activities	Business-Type	e Activities		TOTAL	
September 30,	Principal	Interest	Principal	Interest	Principal	Interest	Total
2020	\$44,000	\$6,200	\$88,000	\$12,400	\$132,000	\$18,600	\$150,600
2021	45,000	5,132	90,000	10,264	135,000	15,396	150,396
2022	46,000	4,040	92,000	8,080	138,000	12,120	150,120
2023	47,333	2,920	94,667	5,840	142,000	8,760	150,760
2024	48,333	1,772	96,667	3,544	145,000	5,316	150,316
2025	49,637	596	99,363	1,192	149,000	1,788	150,788
TOTALS	\$280,304	\$20,660	\$560,696	\$41,320	\$841,000	\$61,980	\$902,980

The general fund (33.33%) and the utility funds (66.67%) are used to service the bonds.

The changes in long-term liabilities are as follows:

			Ending	Due Within	Due after
<b>Balance</b>	<u>Additions</u>	Reductions	<b>Balance</b>	One Year	One Year
\$323,300	\$0	\$42,996	\$280,304	\$43,996	\$236,308

The general fund and the business type funds are used to service the compensated absences. The estimated amount due in the 2019-20 year is \$10,664. The government-wide statement of activities includes \$142,664 as "noncurrent liabilities, due within one year". There was no interest capitalized in the utility fund but rather all the interest was expensed.

#### V. Other information

#### A. Risk management

The City is exposed to various risks of loss related to torts; theft of, damage to and destruction of assets; errors and omissions; injuries to employees; and natural disasters. Claim liabilities are estimated considering the effects of inflation, recent claim settlement trends (including frequency and amounts of payouts) and other economic and social factors (including the effects of specific, incremental claim adjustment expense, salvage, and subrogation).

Changes in accrued liabilities for these claims follow:

	Y ear ended	Y ear ended
	<u>09/30/18</u>	<u>09/30/19</u>
Unpaid claims, beginning of fiscal year Incurred claims (including IBNRs)	\$ -0-	\$ -0-
Claim payments		0-
Unpaid claims, end of fiscal year	<u>\$ -0-</u>	<u>\$ -0-</u>

#### General Liability Insurance

The City is insured for general, police officers and automobile liability. Expenditures for self-insured liabilities are accounted for in the General Fund, which will pay any liabilities incurred.

The City has joined with other governments in the Texas Municipal League Intergovernmental Risk Pool (TML). The City pays an annual premium to TML for auto vehicle insurance coverage. The agreement with TML provides that TML will be self-sustaining through member premiums and will reinsure through commercial companies for claims more than \$500,000 to \$1,000,000 for each insurance event. The City anticipates no contingent losses.

TML has published its own financial report that can be obtained from the Texas Municipal League Intergovernmental Risk Pool, Austin, Texas.

The City carries commercial fidelity bonds for elected officials and for management.

#### Property and Casualty Insurance

Property, casualty, mobile equipment, boiler, and machinery insurance is provided by TML.

#### Workers' Compensation Insurance

The City insures against workers' compensation claims through TML.

#### Group Health and Life Insurance

The City maintains a group health insurance plan for active employees and their eligible dependents. Costs are recorded in the fund from which the employees' compensation is paid.

#### Unemployment Compensation Insurance

The City self-insures for unemployment compensation claims through an agreement with the Texas Workforce Commission (TWC). Under the agreement, TWC administers all claims and is reimbursed by the City for claims incurred plus administrative charges.

#### B. Related party transaction

Chrystal Eckel, the Mayor, is a partner of with Lyssey & Eckel where the City spent \$807.49 for the 2018-2019 fiscal year.

Rose Huizar's sister performed cleaning services for the City at a cost of \$2,600.00 for the 2018-2019 fiscal year.

At year's end there were no amounts owed to any of the above nor did any of the above owe any amounts to the City.

#### C. Subsequent events

Case Filed February 26, 2020: Cause No. 5:20-cv-0026-DAE: United States District Court Western District-San Antonio Division- Skyway Towers, LLC, v. City of Poth, Texas, the City Council of the City of Poth, Texas, Tami Ramzinski, Anabel Ramon, Chuck Morris, Ronald Weimer, and Steven Wiatrek, in their official capacities as members of the City Council of the City of Poth, Texas, and Chrystal Eckel, in her official capacity as Mayor of the City of Poth, Texas.

The plaintiff seeks declaratory judgement and alleges the following: This action arises out of the City's unlawful denial of Skyway's application to construct a wireless telecommunications facility on a commercially-zoned tract of land that is currently occupied by a car wash. The City's denial is not supported by substantial evidence contained in a written record and the denial effectively prohibits the provision of personal wireless service in the vicinity of the proposed facility. Accordingly, the City's denial of Skyway's application violates the federal Communications Act, as amended, 47 U.S.C. § 332(c) (7) (the "Communications Act" or "Act"), and Skyway is entitled to an order directing the City to grant Skyway's application for the proposed facility.

As a result of the spread of the COVID-19 coronavirus, economic uncertainties have arisen which may negatively affect the financial position, results of operations and cash flows of the City. The duration of these uncertainties and the ultimate financial effects cannot be reasonably estimated at this time,

#### D. Contingent liabilities

Amounts received or receivable from grant agencies are subject to audit and adjustment by grantor agencies, principally the federal government. Any disallowed claims, including amounts already collected, may constitute a liability of the applicable funds. The amount, if any, of expenditures that may be disallowed by the grantor cannot be determined at this time, although the government expects such amounts, if any, to be immaterial.

The government is not a defendant at September 30, 2019. Please see note C above.

#### E. Investment in Floresville Electric Light and Power

The City is one of three joint venture investors (investors) in the Floresville Electric Light and Power System (FELPS). In an agreement signed during the fiscal year ending September 30, 1998, the City acquired a permanent 18% undivided equity interest in FELPS. This interest shall remain constant regardless of subsequent differences in rates of growth, population, or consumption. Also, under the agreement, FELPS agreed to annually distribute in the aggregate to the investors an amount not greater than 3% of the dollar value of annual electric sales for the entire system for the year. The amount distributed to each investor is based on the respective equity percentage applied to the total amount approved for distribution by the FELPS board. Distributions are paid monthly in amounts equal to one-twelfth (1/12) of the total distribution amount determined based on sales for the previous year.

For the calendar year ended December 31, 2018 (the fiscal year of FELPS), FELPS' net income was \$5,485,534, of which 18%, or \$987,396 is the City's portion. During the calendar year ended December 31, 2019, the City received distributions of prior year revenue of \$209,607.

During the year ended September 30, 2019 the City reported distributions of \$213,851 based on the calendar years ended December 31, 2017 and 2018 electric sales.

The following represents an excerpt of the audited balance sheet of FELPS as of December 31, 2018.

Total Assets	\$102,897,141
Equity - City of Poth	\$0
Equity - Other Participants	42,914,838

Total	\$29,739	

#### Note to City:

GASB 68 requires 10 fiscal years of data to be provided in the Schedule of Contributions; the City will build this report over the next ID-year period. The data in this schedule is based on the City's fiscal year-end, not the valuation/measurement date as provided in other schedules of this report.

The Actuarially Determined Contribution (ADC) dollar amount can be calculated by multiplying the City's Full Retirement Rate (excludes portion of rate for Supplemental Death Benefits Fund) by the applicable payroll amount (for payroll, cities can use "gross earnings" as noted on line 1 of their T MRS-3 "Summary of Monthly Payroll Report"). The applicable months for the City's fiscal year are summed to determine the total ADC. Actual contribution amounts (employer-portion) remitted to TMRS will equal the "contributions in relation to ADC", with the deficiency/(excess) result then calculated. Covered payroll is the sum of the "gross earnings" for the applicable months of the TMRS-3 reports.

For additional detailed information, please reference the TMRS "GASB 68 Employer Reporting Guide."

Sensitivity of the Net Pension Liability to Changes in the Discount Rate

1% Decrease 5.75%	Current Single Rate Assumption 6.75%	1% Increase 7.75%
\$212,001	\$137,798	\$74,351

# SUMMARY OF ACTUARIAL ASSUMPTIONS

These actuarial assumptions were developed primarily from the actuarial investigation of the experience of TMRS over the four-year period from December 31, 2010 to December 31, 2014. They were adopted in 2015 and first used in the December 31, 2015 actuarial valuation. The postretirement mortality assumption for healthy annuitants and Annuity Purchase Rate (APRs) are based on the Mortality Experience Investigation Study covering 2009 through 2011 and dated December 31, 2013. In conjunction with these changes first used in the December 31, 2013 valuation, the System adopted the Entry Age Normal actuarial cost method and a one-time change to the amortization.

# I. Economic Assumptions

- A. General Inflation General Inflation is assumed to be 2.50% per year.
- B. Discount/Crediting Rates
  - 1. System-wide Investment Return Assumption: 6.75% per year, compounded annually, composed of an assumed 2.50% inflation rate and a 4.25% net real rate of return. This rate represents the assumed return, net of all investment and administrative expenses. This is the discount rate used to value the liabilities of the individual employers,
  - 2. Assumed discount/crediting rate for Supplemental Disability Benefits Fund and individual employee accounts: an annual rate of 5.00% for (1) accumulating prior service credit and updated service credit after the valuation date, (2) accumulating the employee current service balances, (3) determining the amount of the monthly benefit at future dates of retirement or disability, and (4) calculating the actuarial liability of the system-wide Supplemental Disability Benefits Fund.
- C. Overall Payroll Growth 3.00% per year, which is used to calculate the contribution rates for the retirement plan of each participating city as a level percentage of payroll. This represents the expected increase in total payroll. This increase rate is solely due to the effect of wage inflation on salaries, with no allowance for future membership growth. However, for cities with a decrease in the number of contributing members from 2005 to 2014, the payroll growth is decreased by half the annual percentage decrease in the count capped at a 1.0% decrease per year and rounded down to the nearest 0.1%.

#### D. Individual Salary Increases —

Salary increases are assumed to occur once a year, on January 1. Therefore, the pay used for the period year following the valuation date is equal to the reported pay for the prior year, increased by the salary increase assumption. Salaries are assumed to increase by the following graduated service-based scale.

Years of	
	Rate
Service	(%)
1	10.50%
2	7.50%
3	7.00%
4	6.50%
5	6.00%
6	5.50%
7	5.25%
8-10	4.75%
11	4.50%
12-13	4.25%
14-16	4.00%
17-24	3.75%
25+	3.50%

E. Annuity Increase - The Consumer Price Index (CPI) is assumed to be 2.50% per year prospectively. For the City of Poth annual annuity increases of 0.00% are assumed when calculating the TPL.

## II. Demographic Assumptions

#### A. Termination Rates

1. For the first 10 years of service, the base table rates vary by gender, entry age, and length of service. For City of Poth the base table is then multiplied by a factor of 80.0% based on the experience of the city in comparison to the group as a whole. A further multiplier is applied depending on an employee's classification: 1) Fire — 63%, 2) Police - 88%, or 3) Other - 108%. A sample of the base rates follows:

Males										
		Service								
٨٠٠	0	1	2	3	4	5	6	7	88	9

2. After 10 years of service, base termination rates vary by gender and by the number of years remaining until first retirement eligibility. For City of Poth the base table is then multiplied by a factor of 80.0% based on the experience of the city in comparison to the group as a whole. A further multiplier is applied depending on an employee's classification: 1) Fire — 52%, 2) Police — 79%, or 3) Other — 115%. A sample of the base rates follows:

Years from		
Retirement	Male	Female
1	1.72%	2.20%
2	2.29%	2.97%
3	2.71%	3.54%
4	3.06%	4.01%
5	3.35%	4.41%
6	3.61%	4.77%
7	3.85%	5.10%
8	4.07%	5.40%
9	4.28%	5.68%
10	4.47%	5.94%
11	4.65%	6.19%
12	4.82%	6.43%
13	4.98%	6.66%
14	5.14%	6.87%
15	5.29%	7.08%

Termination rates end at first eligibility for retirement

B. Forfeiture Rates (Withdrawal of Member Deposits from TMRS) for vested members vary by age and employer match, and they are expressed as a percentage of the termination rates shown in (A). The withdrawal rates for cities with a 2-to-1 match are shown below. 4% is added to the rates for 1 ½-to-1 cities, and 8% is added for 1-to-1 cities.

	Percent of Terminating			
	Employees Choosing t			
Age	Take a Refund			
25	41.2%			
30	41.2%			
35	41.2%			
40	38.0%			
45	32.6%			
50	27.1%			
55	21.7%			

Forfeiture rates end at first eligibility for retirement.

# C. Service Retirees and Beneficiary Mortality Rates

For calculating the actuarial liability and the retirement contribution rates, the Gender-distinct RP2000 Combined Healthy Mortality Tables with Blue Collar Adjustment are used with male rates multiplied by 109% and female rates multiplied by 103%. Based on the size of the city, rates are multiplied by an additional factor of 97.0%. The rates are projected on a fully generational basis by scale BB to account for future mortality improvements.

# D. Disabled Annuitant Mortality Rates

For calculating the actuarial liability and the retirement contribution rates, the Gender-distinct RP2000 Combined Healthy Mortality Tables with Blue Collar Adjustment are used with male rates multiplied by 109% and female rates multiplied by 103% with a 3-year set-forward for both males and females. In addition, a 3% minimum mortality rate will be applied to reflect the impairment for younger members who become disabled, the rates are projected on a fully generational basis by scale BB to account for future mortality improvements subject to the 3% floor.

# E. Pre-Retirement Mortality

For calculating the actuarial liability and the retirement contribution rates, the Gender-distinct RP2000 Combined Healthy Mortality Tables with Blue Collar Adjustment are used with male rates multiplied by 54.5% and female rates multiplied by 51.5%. The rates are projected on a fully generational basis by scale BB to account for future mortality improvements.

#### F. Annuity Purchase Rates

For determining the amount of the monthly benefit at the time of retirement for both healthy and disabled annuitants, the annuity purchase rates (APRs) for 2014 are based on the UP-1984 Table with an age setback of two years for retirees and an age setback of eight years for beneficiaries. Beginning in 2027 the APRs will be based on a unisex blend of the RP-2000 Combined Healthy Mortality Tables with Blue Collar Adjustment for males and females with both male and female rates multiplied by 107.5% and projected on a fully generational basis with scale BB. For members, a unisex blend of 70% of the males table and 30% of the female table is used, while 30% of the male table and 70% of the female table is used for beneficiaries. From 2015 through 2026, the fully generational APRs will be phased into.

#### G. Disability Rates

Age	Males & Females
20	0.000004
25	0.000025
30	0.000099
35	0.000259
40	0.000494
45	0.000804
50	0.001188
55	0.001647
60	0.002180
65	0.002787

# H. Service Retirement Rates, applied to both Active and Inactive Members

The base table rates vary by gender, entry age group, and age. For members under age 62, these base rates are then multiplied by 2 factors based on 1) employee contribution rate and employer match and 2) if the city has a recurring COLA.

		Males			East also

Recurring COLA: 100%

No Recurring COLA:90%

# Ill. Methods and Assumptions

- A. Valuation of Assets The actuarial value of assets is based on the market value of assets with a ten-year phase-in of actual investment return in excess of (less than) expected investment income. Offsetting unrecognized gains and losses are immediately recognized, with the shortest remaining bases recognized first and the net remaining bases continue to be recognized on their original timeframe. The actuarial value of assets is further adjusted by 33% of any difference between the initial value and a 15% corridor around the market value of assets, if necessary,
- B. Actuarial Cost Method: The actuarial cost method being used is known as the Entry Age Normal Actuarial Cost Method. The Entry Age Normal Actuarial Cost Method develops the annual cost of the Plan in two parts: that attributable to benefits accruing in the current year, known as the normal cost, and that due to service earned prior to the current year, known as the amortization of the unfunded actuarial accrued liability. The normal cost and the actuarial accrued liability are calculated individually for each member. The normal cost rate for an employee is the contribution rate which, if applied to a member's compensation throughout their period of anticipated covered service with the municipality, would be sufficient to meet all benefits payable on their behalf. The normal cost is calculated using an entry age based on benefit service with the current city. If a member has additional time-only vesting service through service with other T MRS cities or other public agencies, they retain this for determination of benefit eligibility and decrement rates. The salary-weighted average of these rates is the total normal cost rate. The unfunded actuarial accrued liability reflects the difference between the portion of projected benefits attributable to service credited prior to the valuation date and assets already accumulated. The unfunded actuarial accrued liability is paid off in accordance with a specified amortization procedure outlined in C below.

C. Amortization Policy: For "underfunded" cities with twenty or more employees, the amortization as of the valuation date is a level percentage of payroll over a closed period using the process of "laddering". Bases that existed prior to this valuation continue to be amortized on their original schedule. Beginning January 1, 2016, all new experience losses are amortized over individual periods of not more than 25 years. Previously, some cities amortized their losses over a 30-year period. New gains (including lump sum contributions) are offset against and amortized over the same period as the current largest outstanding loss base for the specific City which in turn decreases contribution rate volatility.

Once a City reaches an "overfunded" status, all prior non-ad hoc bases are erased and the surplus for overfunded cities is amortized over a 25-year open period.

Ad hoc benefit enhancements are amortized over individual periods using a level dollar policy. The period will be based on the minimum of 15 years or the current life expectancy of the covered group.

For the December 31, 2013 actuarial valuation, there was a one-time change in the amortization policy for underfunded cities implemented in conjunction with the changes to the assumptions and cost method to minimize rate volatility associated with these changes. An initial ARC was developed using the methodology described above. For cities with a decrease in the rate compared to the rate calculated prior to changes, the amortization period for all non-ad hoc bases was shortened enough to keep the rates stable (if possible). Cities with an increase of more than 0.50% were allowed to extend the amortization periods for non-ad hoc bases up to 30 years to keep the full contribution rate from increasing. For cities with an increase of 0.50% or less, the amortization periods for all non-ad hoc bases could be extended to 25 years to keep the rate from increasing. The amortization period calculated in the prior steps was then rounded up to the nearest integer to calculate the final full contribution rate.

D. Small City Methodology For cities with fewer than twenty employees, more conservative methods and assumptions are used. First, lower termination rates are used for smaller cities, with maximum multipliers of 75% for employers with less than 6 members, 85% for employers with 6 to 10 members, 100% for employers with 11 to 15 members, and 115% for employers with less than 100 members.

There is also a load on the life expectancy for employers with less than 15 active members. The life expectancy will be loaded by decreasing the mortality rates by 1% for every active member less than 15. For example, an employer with 5 active members will have the baseline mortality tables multiplied by 90% (10 active members times 1%).

For underfunded plans, the maximum amortization period for amortizing gains and losses is decreased from current levels by 1 year for each active member less than the 20-member threshold. For example, an employer with 8 active members and a current maximum amortization period of 25 will use (25-(20-8)) = 13-year amortization period for the gain or loss in that year's valuation. Under this policy, the lowest amortization period will be 25-(20-1) = 6 years. Once the plan is overfunded, the amortization period will revert back to the standard 25 years.

# IV. Other Assumptions

- 1. Valuation payroll (used for determining the amortization contribution rate): An exponential average of the actual salaries paid during the prior fiscal years, with 33% weight given to the most recent year and 67% weight given to the expected payroll for the previous fiscal year, moved forward with one year's payroll growth rate and adjusted for changes in population.
- 2. Individual salaries used to project benefits: For members with more than three years of service, actual salaries from the past three fiscal years are used to determine the USC final average salary as of the valuation date. For future salaries, this three-year average is projected forward with two years of salary scale to create the salary for the year following the valuation. This value is then projected with normal salary scales.
- 3. Timing of benefit payments: Benefit payments are assumed to be made in the middle of the month. Although TMRS benefits are paid at the end of the month, eligibility for that payment is determined at the beginning of the month, A middle of month payment approximates the impact of the combination of eligibility determination and actual payment timing,
- 4. Percent married: 100% of the employees are assumed to be married.
- 5. Age difference: Male members are assumed to be three years older than their spouses, and female members are assumed to be three years younger than their spouses.
- 6. Optional Forms: Healthy members are assumed to choose a life only benefit when they retire. Disabled members are assumed to select a 50% Joint and Survivor option when they retire.
- 7. Percent electing annuity on death (when eligible): For vested members not eligible for retirement, 75% of the spouses of male members and 70% of the spouses of female members are assumed to commence an immediate benefit in lieu of a deferred annuity or a refund. Those not electing an immediate benefit are assumed to take a refund. All of the spouses of married participants who die after becoming eligible for a retirement benefit are assumed to elect an annuity that commences immediately.
- 8. Partial Lump Sum Utilization: It is assumed that each member at retirement will withdraw 40% of their eligible account balance.
- 9. Inactive Population: All non-vested members of a city are assumed to take an immediate refund if they are not contributing members in another city. Vested members not contributing in another city are assumed to take a deferred retirement benefit, except for those who have terminated in the past 12 months for whom one year of forfeiture probability is assumed. The forfeiture rates for inactive members of a city who are contributing members in another city are equal to the probability of termination multiplied by the forfeiture rates shown in II(A) and "(B) respectively. These rates are applied each year until

retirement eligibility. Once a member is retirement eligible, they are assumed to commence benefits based on the service retirement rates shown in II (H).

- 10. There will be no recoveries once disabled.
- 11. No surviving spouse will remarry and there will be no children's benefit.
- 12. Decrement timing: Decrements of all types are assumed to occur mid-year.
- 13. Eligibility testing: Eligibility for benefits is determined based upon the age nearest birthday and service nearest whole year on the date the decrement is assumed to occur.
- 14. Decrement relativity: Decrement rates are used directly from the experience study, without adjustment for multiple decrement table effects.
- 15. Incidence of Contributions: Contributions are assumed to be received continuously throughout the year based upon the computed percent of payroll shown in this report, and the actual payroll payable at the time contributions are made.
- 16. Benefit Service: All members are assumed to accrue 1 year of eligibility service each year.
- 17. The decrement rates for service-related decrements are based on total TMRS eligibility service.

#### V. Participant Data

Participant data was supplied in electronic text files. There were separate files for (i) active and inactive members, and (ii) members and beneficiaries receiving benefits.

The data for active members included birthdate, gender, service with the current city and total vesting service, salary, employee contribution account balances, as well as the data used in the next calculation of the Updated Service Credit (USC). For retired members and beneficiaries, the data included date of birth, gender, spouse's date of birth (where applicable), amount of monthly benefit, date of retirement, form of payment code, and aggregate increase in the CPI that will be used in the next calculation of the cost of living adjustment.

To the extent possible we have made use of all available data fields in the calculation of the liabilities stated in this report. Actual CPI is used to model the wear-away effect or "catch-up" when a city changes its COLA provisions. Adjustments are made for members who have service both in a city with "20 and out" retirement eligibility and one that hasn't adopted it to calculate the earliest possible retirement date.

Salary supplied for the current year was based on the annualized earnings for the year preceding the valuation date.

Assumptions were made to correct for missing, bad, or inconsistent data. These had no material impact on the results presented.

# Amortization Schedule Deferred (Inflows)/Outflows of Resources

	(\$3,663)			

# Amortization Schedule - Deferred (Inflows)/Outflows of Resources

	Remaining Recognition period (or amortization years)	Total Remaining (Inflow) or Outflow of Resources	2018	2019	2020	2021	2022	2023	Thereafter
difference	e in experience (in	flows)/outflows							
2018	5.2500	(\$4,741)	(\$903)	(\$903)	(\$903)	(\$903)	(\$903)	(\$226)	\$0
		Total	(\$903)	(\$903)	(\$903)	(\$903)	(\$903)	(\$226)	\$0
change in	assumptions (infle	ows)/outflows							
2018	5.2500	(\$1,848)	(\$352)	(\$352)	(\$352)	(\$352)	(\$352)	(\$88)	\$0
2017	4.2500	2,185	514	514	514	514	129	0	0
		Total	\$162	\$162	\$162	\$162_	(\$223)	(\$88)	\$0

#### Schedule of Contributions - (Retiree-only portion of the rate, for OPEB):

Plan/Calendar Year	Total SDB Contribution (Rate)	Retiree Portion of SDB Contribution (Rate)
2019	0.32%	0.11%
2018	0.27%	0.09%
2017	0.34%	0.09%

Note 1: Due to the SDBF being considered an unfunded OPEB plan, benefit payments are treated as being equal to the employer's yearly contributions for retirees.

Note 2: In order to determine the retiree portion of the City's Supplemental Death Benefit Plan contributions (that which is considered OPEB), the City should perform the following calculation:

Total covered payroll * Retiree Portion of SDB Contribution (Rate)

Consideration should be given to the time period of contributions incurred (i.e., City's fiscal year vs. calendar year) to ensure the proper contribution rate is utilized in the above calculation.

# **Actuarial Assumptions**

These actuarial assumptions were developed primarily from the actuarial investigation of the experience of TMRS over the four-year period from December 31, 2010 to December 31, 2014. They were adopted in 2015 and first used in the December 31, 2015 actuarial valuation. The post-retirement mortality assumption for healthy annuitants and Annuity Purchase Rate (APRs) are based on the Mortality Experience Investigation Study covering 2009 through 2011 and dated December 31, 2013.

#### I. Economic Assumptions

- A. General Inflation General Inflation is assumed to be 2.50% per year.
- B. Discount Rates Because the Supplemental Death Benefits Fund is considered an unfunded trust under GASB Statement No. 75, the relevant discount rate for calculating the Total OPEB Liability is based on the Fidelity Index's "20-Year Municipal GO AA Index" rate as of the measurement date
- C. Individual Salary Increases Salary increases are assumed to occur once a year, on January 1. Therefore, the pay used for the period year following the valuation date is equal to the reported pay for the prior year, increased by the salary increase assumption. Salaries are assumed to increase by the following graduated service-based scale.

Years	
of	Rate
Service	(%)
1	10.50%
2	7.50%
3	7.00%
4	6.50%
5	6.00%
6	5.50%
7	5.25%
8-10	4.75%
11	4.50%
12-13	4.25%
14-16	4.00%
17-24	3.75%
25+	3.50%

#### II. Demographic Assumptions

#### A. Termination Rates

1. For the first 10 years of service, the base table rates vary by gender, entry age, and length of service. For City of Poth the base table is then multiplied by a factor of 80.0% based on the experience of the city in comparison to the group as a whole. A further multiplier is applied depending on an employee's classification: 1) Fire –63%, 2) Police – 88%, or 3) Other – 108%. A sample of the base rates follows:

•		1	
Λ	42	31	es

					Ser	vice			••

55	0.2200	0.1738	0.1350	0.1199	0.0834	0.0806	0.0713	0.0705	0.0685	0.0551
60	0.2200	0.1523	0.1350	0.1172	0.0798	0.0843	0.0646	0.0639	0.0429	0.0379
65	0.2200	0.1431	0.1350	0.1150	0.0800	0.0857	0.0667	0.0593	0.0276	0.0280
70	0.2200	0.1447	0.1350	0.1154	0.0800	0.0854	0.0664	0.0601	0.0303	0.0298

2. After 10 years of service, base termination rates vary by gender and by the number of years remaining until first retirement eligibility. For City of Poth the base table is then multiplied by a factor of 80.0% based on the experience of the city in comparison to the group as a whole. A further multiplier is applied depending on an employee's classification: 1) Fire – 52%, 2) Police – 79%, or 3) Other – 115%. A sample of the base rates follows:

Years from Retirement	Male	Female
1	1.72%	2.20%
2	2.29%	2.97%
3	2.71%	3.54%
4	3.06%	4.01%
5	3.35%	4.41%
6	3.61%	4.77%
7	3.85%	5.10%
8	4.07%	5.40%
9	4.28%	5.68%
10	4.47%	5.94%
11	4.65%	6.19%
12	4.82%	6.43%
13	4.98%	6.66%
14	5.14%	6.87%
15	5.29%	7.08%

Termination rates end at first eligibility for retirement

B. Forfeiture Rates (Withdrawal of Member Deposits from TMRS) for vested members vary by age and employer match, and they are expressed as a percentage of the termination rates shown in (A). The withdrawal rates for cities with a 2-to-1 match are shown below. 4% is added to the rates for 1½-to-1 cities, and 8% is added for 1-to-1 cities.

	Percent of Terminating Employees Choosing to
Age	Take a Refund
25	41.2%
30	41.2%
35	41.2%
40	38.0%
45	32.6%
50	27.1%
55	21.7%

Forfeiture rates end at first eligibility for retirement.

#### C. Service Retirees and Beneficiary Mortality Rates

For calculating the OPEB liability and the OPEB contribution rates, the Gender-distinct RP2000 Combined Healthy Mortality Tables with Blue Collar Adjustment are used with male rates multiplied by 109% and female rates multiplied by 103%. Based on the size of the city, rates are multiplied by an additional factor of 97.0%. The rates are projected on a fully generational basis by scale BB to account for future mortality improvements.

#### D. Disabled Annuitant Mortality Rates

For calculating the OPEB liability and the OPEB contribution rates, the Gender-distinct RP2000 Combined Healthy Mortality Tables with Blue Collar Adjustment are used with male rates multiplied by 109% and female rates multiplied by 103% with a 3-year set forward for both males and females. In addition, a 3% minimum mortality rate will be applied to reflect the impairment for younger members who become disabled. The rates are projected on a fully generational basis by scale BB to account for future mortality improvements subject to the 3% floor.

#### E. Pre-Retirement Mortality

For calculating the OPEB liability and the contribution rates, the Gender-distinct RP2000 Combined Healthy Mortality Tables with Blue Collar Adjustment are used with male rates multiplied by 54.5% and female rates multiplied by 51.5%. The rates are projected on a fully generational basis by scale BB to account for future mortality improvements.

#### F. Disability Rates

Age	Males & Females
20	0.000004
25	0.000025
30	0.000099
35	0.000259
40	0.000494
45	0.000804
50	0.001188
55	0.001647
60	0.002180
65	0.002787

# G. Service Retirement Rates, applied to both Active and Inactive Members

The base table rates vary by gender, entry age group, and age. For members under age 62, these base rates are then multiplied by 2 factors based on 1) employee contribution rate and employer match and 2) if the city has a recurring COLA.

		Males			Females

1.5 – 1	0.81	0.86	0.92
2-1	0.86	0.93	1.00

Recurring COLA: 100% No Recurring COLA: 90%

#### III. Methods and Assumptions

- A. Valuation of Assets For purposes of calculating the Total OPEB Liability, the plan is considered to be unfunded and therefore no assets are accumulated for OPEB.
- B. Actuarial Cost Method: The actuarial cost method being used is known as the Entry Age Normal Actuarial Cost Method develops the annual cost of the Plan in two parts: that attributable to benefits accruing in the current year, known as the normal cost, and that due to service earned prior to the current year, known as the amortization of the unfunded actuarial accrued liability. The normal cost and the actuarial accrued liability are calculated individually for each member. The normal cost rate for an employee is the contribution rate which, if applied to a member's compensation throughout their period of anticipated covered service with the municipality, would be sufficient to meet all benefits payable on their behalf. The normal cost is calculated using an entry age based on benefit service with the current city. If a member has additional time-only vesting service through service with other TMRS cities or other public agencies, they retain this for determination of benefit eligibility and decrement rates. The salary-weighted average of these rates is the total normal cost rate. The unfunded actuarial accrued liability reflects the difference between the portion of projected benefits attributable to service credited prior to the valuation date and assets already accumulated.
- C. Supplemental Death Benefit The contribution rate for the Supplemental Death Benefit (SDB) is equal to the expected benefit payments during the upcoming year divided by the annualized pay of current active members and is calculated separately for actives and retirees. Due to the significant reserve in the Supplemental Death Fund, the SDB rate for retiree coverage is currently only one-third of the total term cost.

#### IV. Other Assumptions

- 1. Inactive Population: All non-vested members of a city are assumed to take an immediate refund if they are not contributing members in another city. Vested members not contributing in another city are assumed to take a deferred retirement benefit, except for those who have terminated in the past 12 months for whom one year of forfeiture probability is assumed. The forfeiture rates for inactive members of a city who are contributing members in another city are equal to the probability of termination multiplied by the forfeiture rates shown in II(A) and II(B) respectively. These rates are applied each year until retirement eligibility. Once a member is retirement eligible, they are assumed to commence benefits based on the service retirement rates shown in II(G).
- 2. There will be no recoveries once disabled.
- 3. Decrement timing: Decrements of all types are assumed to occur mid-year.
- 4. Eligibility testing: Eligibility for benefits is determined based upon the age nearest birthday and service nearest whole year on the date the decrement is assumed to occur.
- 5. Decrement relativity: Decrement rates are used directly from the experience study, without adjustment for multiple decrement table effects.

- 6. Incidence of Contributions: Contributions are assumed to be received continuously throughout the year based upon the computed percent of payroll shown in this report, and the actual payroll payable at the time contributions are made.
- 7. Benefit Service: All members are assumed to accrue 1 year of eligibility service each year.
- 8. The decrement rates for service-related decrements are based on total TMRS eligibility service.

#### V. Participant Data

Participant data was supplied in electronic text files. There were separate files for (i) active and inactive members, and (ii) members and beneficiaries receiving benefits.

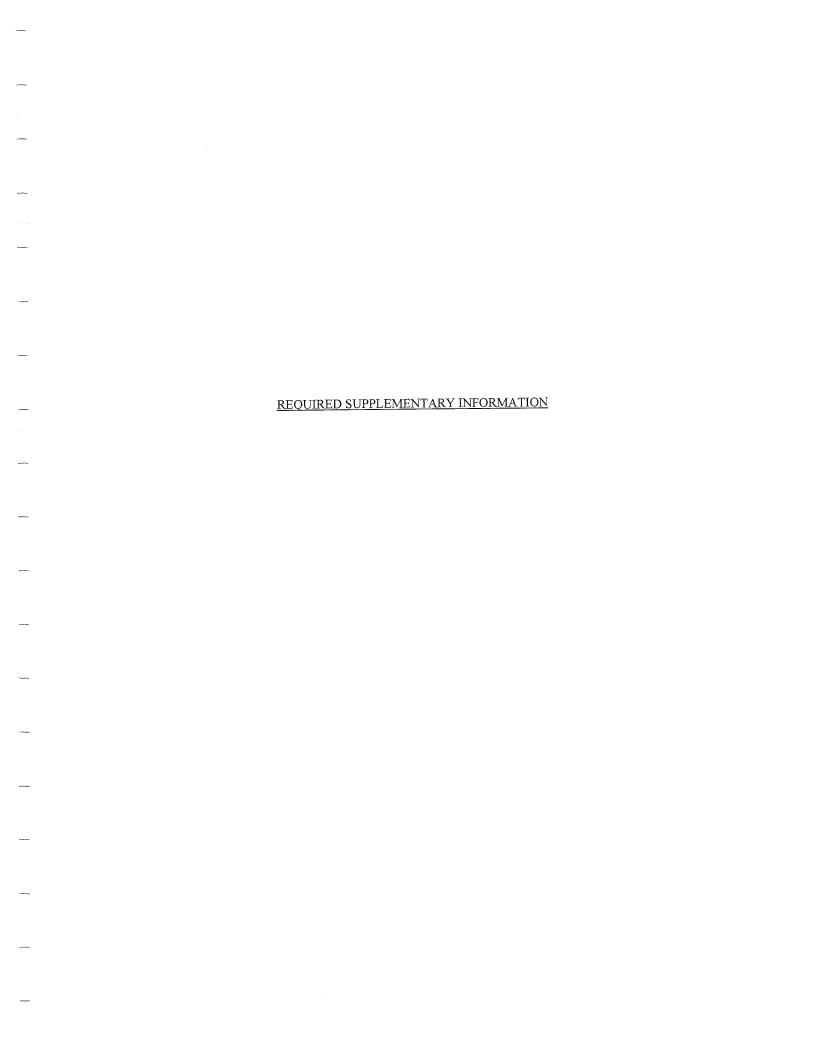

The data for active members included birthdate, gender, service with the current city and total vesting service and salary. For retired members, the data included date of birth, gender and date of retirement.

To the extent possible we have made use of all available data fields in the calculation of the liabilities stated in this report. Adjustments are made for members who have service both in a city with "20 and out" retirement eligibility and one that hasn't adopted it to calculate the earliest possible retirement date.

Salary supplied for the current year was based on the annualized earnings for the year preceding the valuation date.

Assumptions were made to correct for missing, bad, or inconsistent data. These had no material impact on the results presented.

#### SCHEDULE OF CONTRIBUTIONS

Last 10 Fiscal Years (will ultimately be displayed)

	2015	2016	2017	2018
Actuarially Determined Contribution	\$ xxx,xxx	\$ xxx,xxx	\$ xxx,xxx	\$ xxx,xxx
Contributions in relation to the actuarially determined contribution	\$ xxx,xxx	\$ xxx,xxx	\$ xxx,xxx	\$ xxx,xxx
Contribution deficiency (excess) Covered payroll Contributions as a percentage of covered	\$ xxx,xxx \$ xxx,xxx	\$ xxx,xxx \$ xxx,xxx	\$ xxx,xxx \$ xxx,xxx	\$ xxx,xxx \$ xxx,xxx
payroll	xx.xx%	xx.xx%	xx.xx%	xx.xx%

#### NOTES TO SCHEDULE OF CONTRIBUTIONS

Valuation Date:

Notes

Actuarially determined contribution rates are calculated as of December 31 and become effective in January 13 months later.

Methods and Assumptions Used to Determine Contribution Rates:

Actuarial Cost Method

Entry Age Normal

Amortization Method

Level Percentage of Payroll, Closed

Remaining Amortization

19 years

Period

Asset Valuation Method

10 Year smoothed market; 15% soft corridor

Inflation

2.50%

Salary Increases

3.50% to 10.50% including inflation

Investment Rate of Return

6.75%

Retirement Age

Experience-based table of rates that are specific to the City's plan of benefits. Last updated for the 2015 valuation pursuant to an experience study of the period

2010-2014.

Mortality

RP2000 Combined Mortality Table with Blue Collar Adjustment with male rates multiplied by 109% and female rates multiplied by 103% and projected on a fully

generated basis with scale BB

Other Information:

Notes

There were no benefit changes during the year.

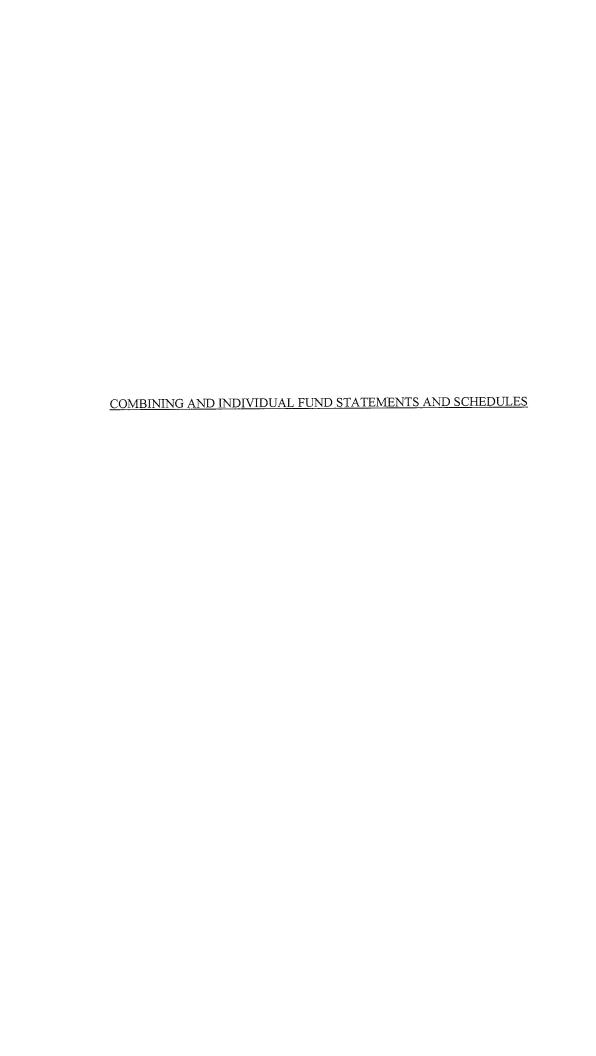

# **OPEB Retirement System Information:**

## OPEB Plans

# Changes in the Total OPEB Liability

Changes for the year	2018
1. Service Cost	\$1,532
2. Interest on Total OPEB Liability	1,289
3. Changes of benefit terms	0
4. Difference between expected and actual experience	(4,741)
5. Changes in assumptions or other inputs	(1,848)
6. Benefit payments	(394)
7. Net changes	(4,162)
Total OPEB Liability - beginning of year	38,370
Total OPEB Liability - end of year	\$34,208
E. Covered-employee payroll (B.9 / A.9)	\$437,779
F. Total OPEB Liability as a Percentage of Covered Payroll	7.81%
